PROFIRE - WHO ARE WE?

Profire Energy, Inc. is a leading oilfield-technology company that specializes in burner and chemical management systems. Our flagship burner management system (BMS) products ignite, monitor, and manage the burner flames that are widely used in oilfield production and transportation equipment (i.e. firetube vessels). The illustration below shows where Profire's products are used in the industry (indicated by red Profire flags in figure 1 below):

Without a burner management system, increased manual labor is required to ensure the flames are burning at the correct temperature, and production can become compromised. When a burner flame goes out completely, a worker reignites it manually, using a fuel-soaked rag and stick. This is inefficient and dangerous.

FIGURE 1

OUR INDUSTRY

In North America alone, there are an estimated ~1.7M oil and gas wells. This suggests a potential BMS market of ~0.85M-1.7M fire tube vessels today (assuming 0.5 - 1 per well), and a potentially significant market. Additionally, an estimated 60% of wells use chemical at the well head, representing a potential of ~1M installations of our CMS technology.

HISTORICAL FINANCIALS - ANNUAL

Profire Energy, Inc. Profire Energy has ~47.5M shares outstanding ¹, with ~24.3M shares floated. Trailing fifty-day average volume is ~227K shares ², with a market cap of ~\$206M ². See Figure 2 below for an illustration of Profire's historical annual financials (as well as the "disclaimer and references" page for information pertaining to the footnotes).

FIGURE 2

HISTORICAL FINANCIALS - QUARTERLY

Profire's consistent ability to operate efficiently, generate positive cash-flow, and thus remain debt free has provides a significant operating flexibility, and poises Profire for long-term growth. Please note that as of the most recent quarter, revenues have increased 55% Year-over-Year and 11% Quarter-over-Quarter.

PROFIRE

OUR CUSTOMERS

We sell to distributors (e.g. Cameron), oil/gas producers (e.g. Shell, Chesapeake), oilfield servicers (e.g. Valerus), and OEMs (e.g. Leed Fabrication, Aereon, Exterran). Some of our distribution channels are international (e.g. Brazil, Australia). Below you'll find just a few of the customers we commonly work with.

OUR VALUE

Three main factors drive our product sales, in both the BMS and CMS market: first, improved efficiency (6-12 month payback), second, improved safety, and third, improved compliance (state and industry).

IMPROVED
EFFICIENCY

IMPROVED
SAFETY

IMPROVED
COMLIANCE

OUR POSITION

Profire Energy is the only public company specializing in oilfield BMS in North America, with approximately 60,000 units installed. We excel in providing solutions to some of the largest players in the oil & gas industry.

PROFIRE

OUR PRODUCTS

We have designed a robust product line to meet the demands of a wide array of oilfield vessels. Each is designed for a slightly different use and environment, but ultimately helps monitor and/or manage the flames used in oilfields. In fiscal 2015 extended our product line to include chemical management systems (CMS). We also sell complementary products (e.g. comm. & expansion cards, Airplate), which greatly enhance overall burner management solutions for our customers.
